

Simply brilliant, brilliantly simple

expolinc **4 SCREEN**
CLASSIC

In the XL version up to 5 sq. m of surface

Impressive in design and quality

The 4-screen Classic is just as robust as it is light. Its lightness keeps you mobile and flexible. The chosen materials and smart details guarantee the stability and dependability of your 4-screen Classic. Choose between 5 widths, from 55 to 200 cm, and 4 heights (148, 195, 215 and 245 cm).

The great XL version provides you with up to 5 m² of presentation surface on a single banner. Two vertical rods and pedestals ensure that this impressive size gets the stability needed. And an ingenious bolted fastening lets you link up several 4-screen Classics into complete trade fair surfaces.

The assembly requires no tools. Foot and rods are assembled in seconds. The horizontal channels protect your graphics and ensure they are quickly mounted.

With their clever screw connectors, 4-screen Classics can be joined together forming an imposing 4-screen Wall. The screw connectors, available in a 30° and a straight version, allow for an almost unlimited expansion of a 4-screen Wall.

The transport is just as simple as the assembly. Each 4-screen Classic element has its own bag, allowing for easy handling, even in large numbers.

The robust carrying bag, no larger than a poster roll, optimally protects your graphic and has enough room inside for the complete system. Choose between two elegantly formed halogen spots – both of which put your message in the right light.

Exclusive quality with a lifetime guarantee and unbeatable value-for-money.

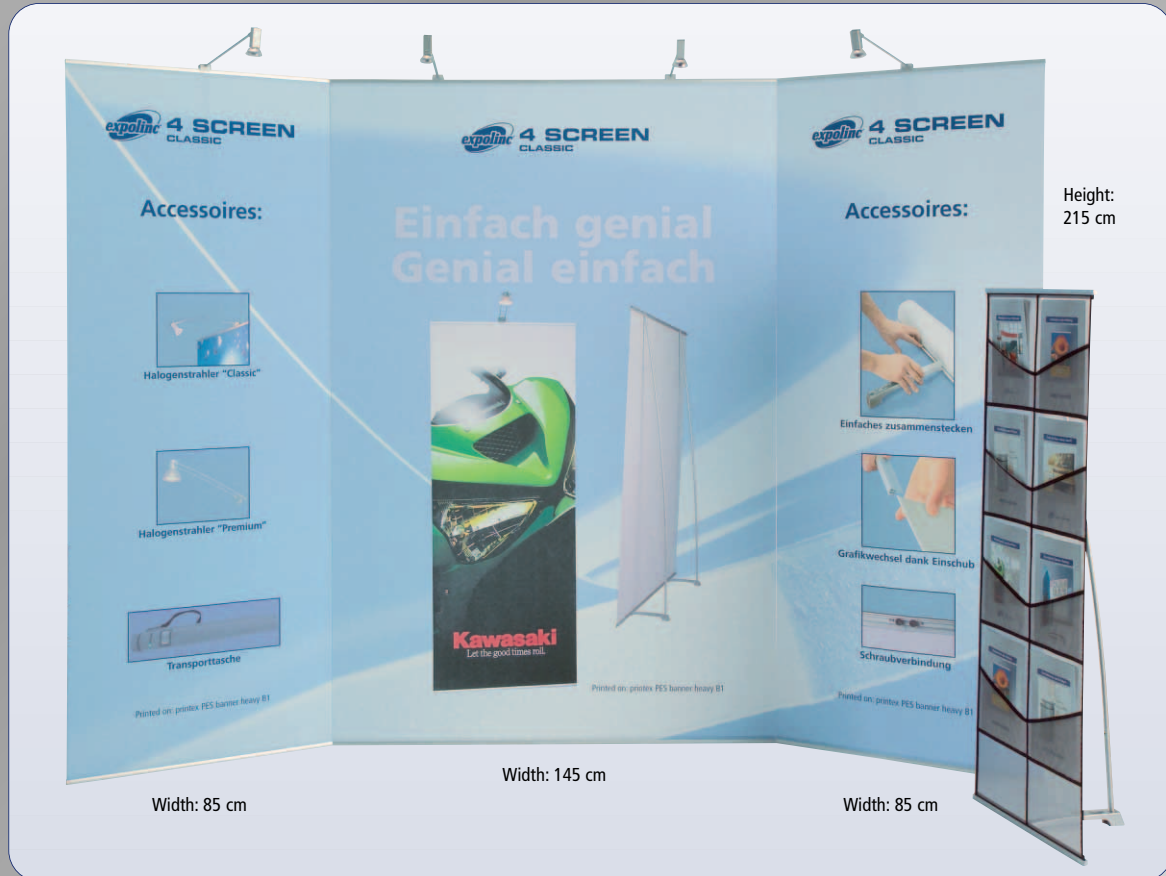

Foot and rod are assembled in seconds – no tools needed

The slide-in method sees to rapid graphic changes

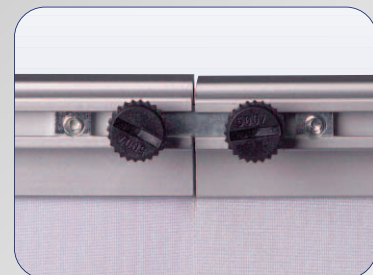

expolinc® 4 SCREEN CLASSIC WALL

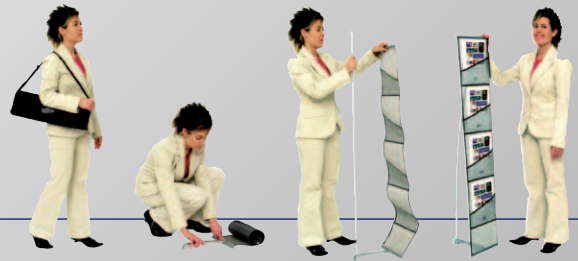

In a few easy steps, single elements create a 4-screen Wall, here with the 4-screen Classic Brochure Stand with eight compartments.

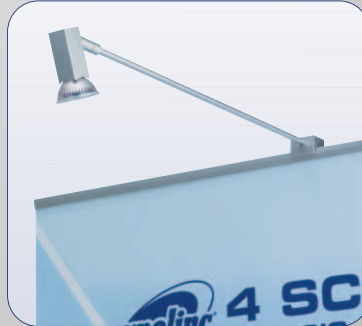

Each system is packed in its own transport bag.

From display to display wall with the clever screw connector: in a 30° (photo above) and a straight version (photo left).

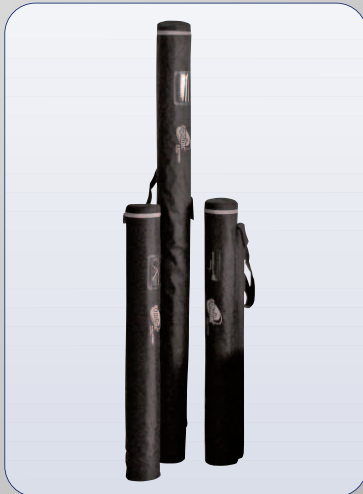

Halogen spot – "Premium"

Halogen spot – "Classic"

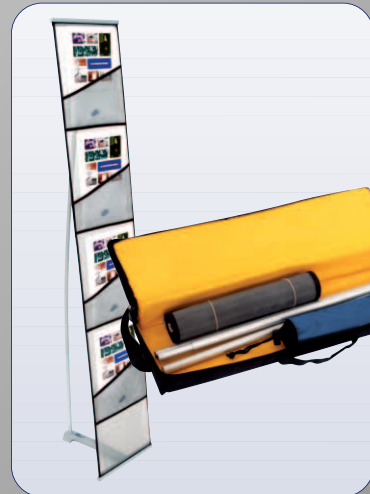

The transport bags for the lamps are easily attached to the 4-screen Classic quiver.

Practical carrying bag

The multi-bag holds up to nine 4-screen Classic systems up to 85 cm wide.
